

WHAT IS CLAIMED IS:

1. A plaster comprising a styrene-isoprene-styrene block copolymer 10-40 wt%, a rosin-based resin 5-30 wt%, a plasticizer 20-70 wt%, polyisobutylene 6-40 wt%, an antioxidant 0.1-5 wt%, and felbinac as a medicinally effective component 1.1-10 wt%, wherein said plaster does not contain crotamiton which is a solubilizer for said felbinac, said felbinac is uniformly dispersed in a semi-solubilized state in said plaster, wherein solubilized felbinac and microcrystalline felbinac coexist in said plaster, and a thickness of said plaster is 50-300 μ m.

2. A plaster according to Claim 1, further comprising a backing made of a stretch polyester fabric.

3. A plaster according to Claim 2, wherein said stretch polyester fabric is one demonstrating longitudinal strength 200 g to 3 kg and lateral strength 100 g to 600 g in a 30 %-modulus test under measurement conditions of sample width 50 mm, sample length 200 mm, and elongation strength 200 mm/min.

4. A plaster according to Claim 2, wherein a basic weight of said backing is 100 ± 30 g/m².

5. A plaster according to Claim 1, wherein said plaster contains no solubilizers for said felbinac, at all.

6. A plaster according to Claim 1, wherein a blending ratio of said felbinac is 3-7 wt% of the whole plaster.

7. A plaster according to Claim 1, wherein blending

ratios of the whole plaster are the following: for said styrene-isoprene-styrene block copolymer; 15-35 wt%, said rosin-based resin; 10-25 wt%, said plasticizer; 30-60 wt%, said polyisobutylene; 6.5-20 wt%, and said antioxidant; 0.5-2 wt%.

8. A plaster according to Claim 1, wherein said plasticizer is liquid paraffin and said antioxidant is dibutylhydroxytoluene.

9. A plaster according to Claim 1, wherein said thickness of said plaster is 80-200 μm .

10. A plaster consisting essentially of a styrene-isoprene-styrene block copolymer 10-40 wt%, a rosin-based resin 5-30 wt%, a plasticizer 20-70 wt%, polyisobutylene 6-40 wt%, an antioxidant 0.1-5 wt%, and felbinac as a medicinally effective component 1.1-10 wt%, wherein said plaster does not contain crotamiton which is a solubilizer for said felbinac, said felbinac is uniformly dispersed in a semi-solubilized state in said plaster, wherein solubilized felbinac and microcrystalline felbinac coexist in said plaster, and a thickness of said plaster is 50-300 μm .
